

# DIVERSICROP NEWSLETTER

-CA22146- MARCH 2024

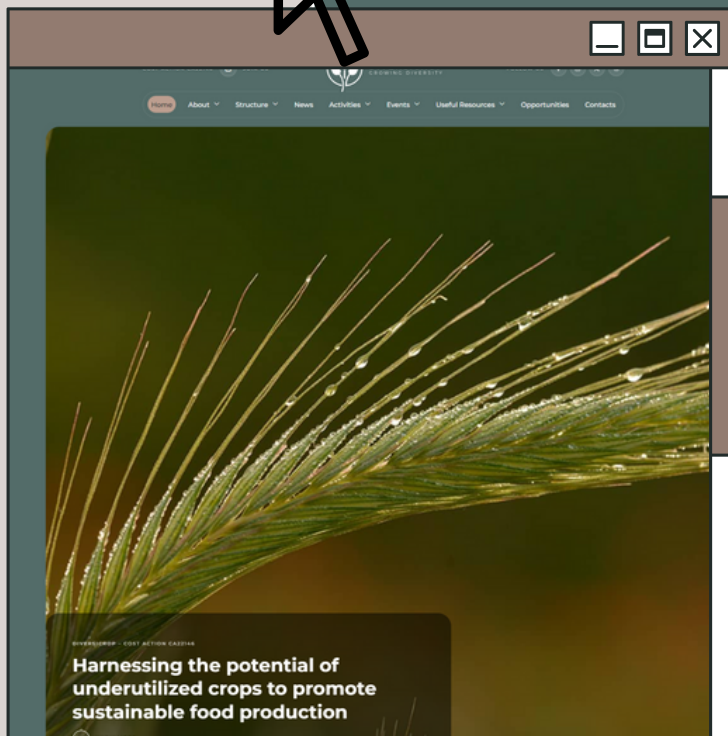

Diversity is good for nature and for our well-being. Agriculture is dominated by few crop species, and local specialization further depletes diversity at national and local levels. DIVERSICROP addresses this, enabling future engagement with crops such as rye, chickpeas and peas by understanding their ancient history, existing germplasm and limitations, nutrition importance and policy aspects.

MEETING IN  
BUDAPEST SUMMARY

2.

Our Action's first hybrid meeting took place on February 13-15 in Budapest (Hungary), hosted by Dr. Bálint Balázs and joining 40 WG members representing 19 countries (23F/17M; ~30% YRI).

The Zoom recording for the plenary session is below (please note that there is poor sound quality in the first 27 minutes of the recording):

passcode: qHf6=Y%g

# MEETING IN BUDAPEST

# 2.

DIVERSICROP Core Group (CG) and Working Groups (WGs) held their first hybrid meeting, fostering fruitful discussions in a collaborative atmosphere.

WGs planned their main activities for the upcoming months (e.g. online webinars and meetings, training school, data collection and analysis, etc.).

CG took steps to strengthen DIVERSICROP Science Communication .
