Short-term scientific missions in DIVERSICROP

A short-term scientific mission (STSM) is a visit to a host organization located in a different country than the country of affiliation by a researcher or innovator to conduct specific work for a determined period of time. Award winners receive funding (maximum of EUR 4,000 in total) for work visits to host organisations in other countries to gain new knowledge or access to equipment or techniques not available in the home institution.

Applicants must have an e-COST profile and applications must be submitted online in e-COST.

Applications describe goals and the work to be carried out by the applicant, expected results (outcomes) and description of the contribution to the objectives of DIVERSICROP.
